To Whom It May Concern: Have you lost your minds???? One of the best new things about XM Radio is the public service provided to get us around major metropolitan areas with as little hassel as possible. Is it the fact that they are doing this as a public service, therefore not allowing you to cash in on it? Why should this be of any interest to you anyway? Is the fact that XM subscribers are able to navigate SAFELY!!!! around these areas pose some sort of threat to you???? The broadcasters are concerned that none of us is listening to the DAILY DRIVEL dished up by the mass media. We are able to choose(A right given to us under the Constitution) what we want to hear. We a re not listening to the CRAP that the advertisers want to shove down our throats. We are not being led astray by the almighty ad \$\$\$\$\$\$. If they could take a trip, as I just did, 3500 miles and not have to constantly search for a decent station, they would endorse XM Radio as we all have. I feel very strongly that this shouldnot and will not come to pass. My local Representative and Senators will also be getting a similar letter. Thank you for your tiame. John Healy
